EXPERIENCE

Data Analyst, Example Ltd Jun 2024 – Present

- Built a churn model in Python that cut customer losses by 12 per cent across two regional teams, and presented the results to the operations director each month.
- Automated the weekly reporting pack for five teams using SQL and Excel macros, which saved six hours of manual work every week and removed copy-and-paste errors.
- Led a four-person student team that designed and shipped a budgeting app now used by 150 students, handling the backlog and the weekly demos.

EDUCATION

BSc Mathematics, Northfield University, 2021 to 2024.

SKILLS

Python, SQL, Excel, Tableau
