PROFILE

Mathematics graduate with two years of analytics experience in retail, now moving into data engineering. Comfortable owning a reporting pipeline end to end and explaining results to non-specialists.

EDUCATION

BSc Mathematics, Northfield University 2021 – 2024

First-class honours, with modules in statistics, optimisation and programming.

EXPERIENCE

Data Analyst, Example Ltd Jun 2024 – Present

- Built a churn model that cut customer losses by 12 per cent across two regions.
- Automated weekly reporting for five teams, saving six hours of manual work a week.
- Presented monthly findings to the operations director and two regional managers.
- Trained three new analysts on the reporting pack and the data warehouse.
- Cut dashboard load times from 40 seconds to 4 by rewriting six SQL views.
- Ran a pricing test across 30 stores that lifted margin by 2 points.

Research Intern, Fenwick Systems September 2023 to December 2023

- Analysed sales data for 40 stores and presented findings to three regional managers.
- Wrote Python scripts that cleaned 20,000 records a day with no manual checks.
- Mapped the returns process and removed two approval steps, saving a day per claim.
- Built a forecasting model that reduced stock-outs by 18 per cent over a quarter.
- Designed a survey of 400 customers and turned the results into three product changes.
- Documented 25 reports so a new starter could run month-end without help.

EXTRACURRICULAR ACTIVITIES

President, Data Society 2022 – 2024

- Designed and shipped a budgeting app now used by 150 students.
- Organised a 12-team hackathon with 90 entrants and three sponsor companies.
- Raised £3,000 for the society through two events and a sponsorship deal.
- Coached a six-person committee and handed over a 20-page operations guide.
- Edited the society newsletter for 600 members, doubling the open rate to 48 per cent.
- Negotiated a 20 per cent discount on venue hire for the year's events.

SKILLS

Python, SQL, Excel, Tableau, Git, R, dbt and Power BI
